## A Message from the Director

The 1992 Crime in Alabama report is the seventeenth annual report published by the Alabama Criminal Justice Information Center (ACJIC). This report concentrates on the major index offenses reported to the Uniform Crime Reporting program (UCR) by the state's law enforcement agencies for calendar year 1992.

The crime statistics presented in this report are compiled for the state, Alabama's nine Metropolitan Statistical Areas (MSA's), Sheriffs' Offices, Municipal Police Departments and Campus Police. UCR data deals with criminal activity in a specific geographical area rather than with law enforcement agencies' activities; therefore, it should not be used to evaluate or compare one agency with another. UCR is only one aspect of the activities and responsibilities of the law enforcement community.

We hope this report will provide a comprehensive picture of crime in our state during 1992. Requests for additional information may be directed to this office, 770 Washington Ave., Montgomery, Alabama 36130. Telephone (205) 242-4900; FAX Number (205) 242-0577.

Sincerely,

Larry Wright

## Preface

The 1992 Crime in Alabama report is intended to inform law enforcement officials and private citizens of criminal and law enforcement activity in Alabama. Since the UCR offense and arrest data are the basis of this report, it must be noted that other factors affecting crime are not measured by UCR, such as age, sex, and race of the population, economic conditions of the area, transient population, culture, education, climate, attitudes of the victims toward crime and police, and crime reporting practices of the citizens. Therefore, it is difficult to draw conclusions or make valid comparisons between various jurisdictions by using only the crime and arrest data in this book. The data in this book are used for analyzing crime problems inherent in the criminal justice system and as a foundation for planning and budgeting.

Geographic areas covered in this report include the State of Alabama, Metropolitan Statistical Areas (MSA's), county and city strata. A 1992 Crime by County report is contained in Appendix A.

We would like to extend our appreciation to law enforcement agencies--sheriff's departments, municipal police departments, and campus police--for their cooperation in the UCR program.

## Introduction

In October of 1975, Act 872 passed both houses of the Alabama Legislature creating and establishing the Alabama Criminal Justice Information Center (ACJIC) which is commissioned to collect, store, retrieve, analyze, and disseminate criminal justice data. Inherent in ACJIC is a "uniform crime reporting system for the periodic collection and analysis of crimes reported to any and all criminal justice agencies within the state." (Act 872, Section 9, 1975)

With the passage of this bill, mandatory reporting was required of law enforcement agencies in Alabama. Prior to 1976, law enforcement agencies participated in the FBI's Uniform Crime Reporting Program (UCR) on a voluntary basis. Since mandatory submission, there has been a 185% increase in UCR reporting.

Alabama's UCR program functions in accordance with FBI standards of operation, i.e., a uniform data collection device and quality control procedures which provide viable crime statistics for accurate indication of crime and crime trends.

ACJIC implemented an incident-based reporting system as an alternative to UCR summary reporting in 1977. This Incident-Based Reporting (IBR) System also provides a self-contained internal recordkeeping system for the agency.

IBR is a voluntary system with 99% of Alabama's agencies participating. This reporting program is more detailed providing greater potential for services, analyses, and resource studies by both the individual agency's crime analysis units and ACJIC.

In 1986, ACJIC organized a 32-person UCR Committee to review the IBR report forms. This committee was made up of law enforcement personnel from small, medium and large police departments and sheriff's departments, computerized agencies, the FBI, and the Bureau of Justice Statistics (BJS). The committee reviewed and analyzed the ten year old forms and decided that enhancements were needed. The IBR report forms were re-designed with input from Alabama's local agencies.

Alabama's law enforcement agencies are supplied with monthly reporting forms by ACJIC's Technical Assistance field staff who are also made available to the reporting agencies to help answer any questions which may arise regarding forms, crime classifications, and clearance data.

The Technical Assistants are also responsible for training law enforcement personnel and maintaining the quality of information for output to the criminal justice system.

When the UCR incident reports are returned to ACJIC, they are reviewed for accuracy by the quality control section of UCR. Then the Alabama UCR program furnishes the contributing agencies and the FBI with data for their verification and review process.

Alabama's law enforcement community can be proud of the progress made in the incident reporting program. Because of the support and dedication of our law enforcement Alabama is one of the states leading the way for a national IBR system.

## Crime and Arrest Data

Valid crime data can provide a solid foundation for statistical analyses, management-oriented analyses and crime breakdowns. These analyses can then aid local police departments in laying out patrol districts, assigning patrol units, and designating community education programs.

Data used in this report are provided by the Uniform Crime Reporting section (UCR) of the Alabama Criminal Justice Information Center (ACJIC). ACJIC's UCR section is the depository for reported offenses and has the responsibility of collecting and disseminating crime data.

In 1992, approximately 300 agencies reported known offenses to Alabama's UCR; 99% of Alabama's law enforcement agencies submitted Incident Reports and 1% returned UCR Summaries.

Through a mandate of Congress, Arson is counted as a Part I Offense. So as not to distort crime trends in Total and Property Crime indices, Arson totals will not be included in these sections but will be included in a separate section following property crimes.

Crime data are obtained from the Part I Index of Offenses submitted by lawenforcement agencies to Alabama's UCR program. These Part I Offenses are divided into Violent Crime and Property Crimes.

Violent Crimes include Homicide, Rape, Robbery, and Assault. These crimes are considered violent inasmuch as they are offenses perpetrated against a person(s) with a high risk or injury or death to the victim(s).

Property Crimes are comprised of Burglary, Larceny, Motor Vehicle Theft, and Arson\*. Property or Non-Violent Crimes lack the aspect of force and/or bodily harm to the victim(s).

Clearance and arrest data are also reported to Alabama's UCR. A crime is considered cleared, either by arrest or by exceptional means, when enough evidence is found to charge a suspect and take him/her into custody. It is conceivable that one arrest could clear several offenses or that several arrests could clear one offense. The clearance rate is achieved by taking the number of clearances over the number of crimes reported:

$$\frac{\text{CLEARANCES}}{\text{REPORTED CRIME}} = \text{CLEARANCE RATE}$$

---

\*A separate section on Arson will be included in this report.

This report is a composite picture of crime and law enforcement activity in Alabama for 1992. It provides a breakdown for the State, the State's nine Metropolitan Statistical Areas (MSA's) and localities participating in the UCR program.

The report concentrates on the Index Crime of the FBI's Part I Offenses and offers tabular and narrative formats for comparisons, trends, rates, and percent changes.

## Definition of Terms

- Adult** - the UCR system defines adults as 18 years of age and over.
- Arrest** - a measure of law enforcement activity by which an individual is detained in legal custody.
- Arson** - willful or malicious burning with or without intent to defraud, includes attempts. (Through a Congressional mandate, 1979 was the first year arson was counted as a Part I offense.) Arson is divided into the following categories:

### Structural

- Single occupancy residential - houses, townhouses, duplexes, etc.
- Other residential - apartments, tenements, hotels, motels, dormitories, boarding houses, etc.
- Storage - barns, garages, warehouses, etc.
- Industrial/manufacturing.
- Other commercial - stores, restaurants, offices, etc.
- Community/public - churches, jails, schools, colleges, hospitals, etc.
- All other structures - outbuildings, monuments, buildings under construction, etc.

### Mobile

**Central city** - a city with at least 50,000 residents.

**City strata** - a breakdown of cities according to population.

- Clearance** - a measure of law enforcement activity which shows that a crime has been solved for crime reporting purposes either by the arrest of a suspect or by exceptional means. Exceptional means provides a solution to a crime when there is enough evidence to place a formal charge against an offender, but some element beyond law enforcement control precludes an actual arrest. It is possible for one arrest to clear more than one offense.
- Clearance rate**- the clearance rate is achieved by taking the number of clearances over the number of crimes reported.
- Crime rate** - a measure of criminal activity which shows the number of crimes reported per 100,000 residents.
- Criminal activity** - measured by reported crimes, trends, rates.
- Forcible entry** - offenses in which force of any kind is used to unlawfully enter a structure for the purpose of committing a theft or felony.
- Hierarchy of Offenses** - whenever more than one offense is committed simultaneously, the most severe offense is reported to UCR. The exception is arson which is always reported along with the most serious offense.
- Homicide** - the willful killing of another as based on police investigation.
- Incident-Based Reporting System** - a voluntary crime reporting system developed by ACJIC as an alternative to the UCR Summary.
- Juveniles** - the UCR system defines juveniles as males and females 17 years of age and younger.
- Larceny** - unlawful taking or stealing of property or articles without the use of force, violence or fraud, i.e., pocket picking, purse snatching, shoplifting, theft from coin-operated machines, etc.
- Law enforcement activity** - police activity as measured by clearances and arrests.

**Reported Crimes -**

crimes reported to law enforcement officials.

The tables on the following pages group cities according to population and list city names alphabetically. The percent change is the increase or decrease in reported crime over 1991. The numbers in parentheses indicate the number of months the agency reported to UCR if less than twelve months.

This report does not try to account for factors which contribute to the number and type of crime in a particular area, i.e., age, sex, race of population, transients, climate, employment, etc. Any effort to make crime comparisons between one area and another should be limited in scope and acknowledge the existence of these various factors impacting the incidence of crime.

\* Percentages do not add up to 100% because the Sheriff's jurisdictions are not included here.

# CLEARANCE RATES

\* \* \* \* \*

A clearance is a measure of law enforcement activity whereby enough evidence is found to charge a suspect and take him into custody (an arrest) or when a crime is solved but no formal charges are brought against a suspect (clearance by exceptional means). The clearance rate is achieved by taking the number of offenses and dividing that number into the number of clearances.

$$\frac{\text{CLEARANCES}}{\text{REPORTED OFFENSES}} = \text{CLEARANCE RATE}$$

It is important to note that clearance data is reported on a monthly basis to UCR and, therefore, it is possible for an arrest made in one month to clear a crime committed in previous months or years.

## COUNTY DATA

Alabama is comprised of sixty-seven (67) counties, each averaging 756.8 square miles.

Incorporated and unincorporated areas not having a municipal police department are protected by the county sheriff and are included in his jurisdiction. Since UCR data deals with criminal activity in a particular geographic area rather than with law enforcement agencies' activities, we do not intend, nor recommend, that this data be used to evaluate or compare one agency with another.

So, due to the diverse demographic characteristics, the county data will be presented in alphabetical order rather than be population strata. It will include reported crime and clearance data submitted by Alabama's 67 county sheriffs. County data does not include crime data submitted by municipal police departments contained within the county boundaries. The numbers in parentheses on the following pages denote the number of months the agency reported to UCR if it was less than twelve.

## CLEARANCE RATES

\* \* \* \* \*

A clearance is a measure of law enforcement activity whereby enough evidence is found to charge a suspect and take him into custody (an arrest) or when a crime is solved but no formal charges are brought against a suspect (clearance by exceptional means). The clearance rate is achieved by taking the number of offenses and dividing that number into the number of clearances.

$$\frac{\text{CLEARANCES}}{\text{REPORTED OFFENSES}} = \text{CLEARANCE RATE}$$

It is important to note that clearance data is reported on a monthly basis to UCR and, therefore, it is possible for an arrest made in one month to clear a crime committed in previous months or years.

## METROPOLITAN STATISTICAL AREAS

Metropolitan Statistical Areas (MSA) are comprised of a county or contiguous counties containing a central city of 50,000 residents or more. MSA's take their name from the central city.

Alabama has nine MSA's made up of eighteen counties. They cover a total of 14,437 square miles and contain 62% of Alabama's population with an average of 177.9 people per square mile. Alabama's MSA's include:

Anniston - Calhoun County

Birmingham - Blount, Jefferson, St. Clair, Shelby, and Walker Counties

Dothan - Dale and Houston Counties

Florence - Colbert and Lauderdale Counties

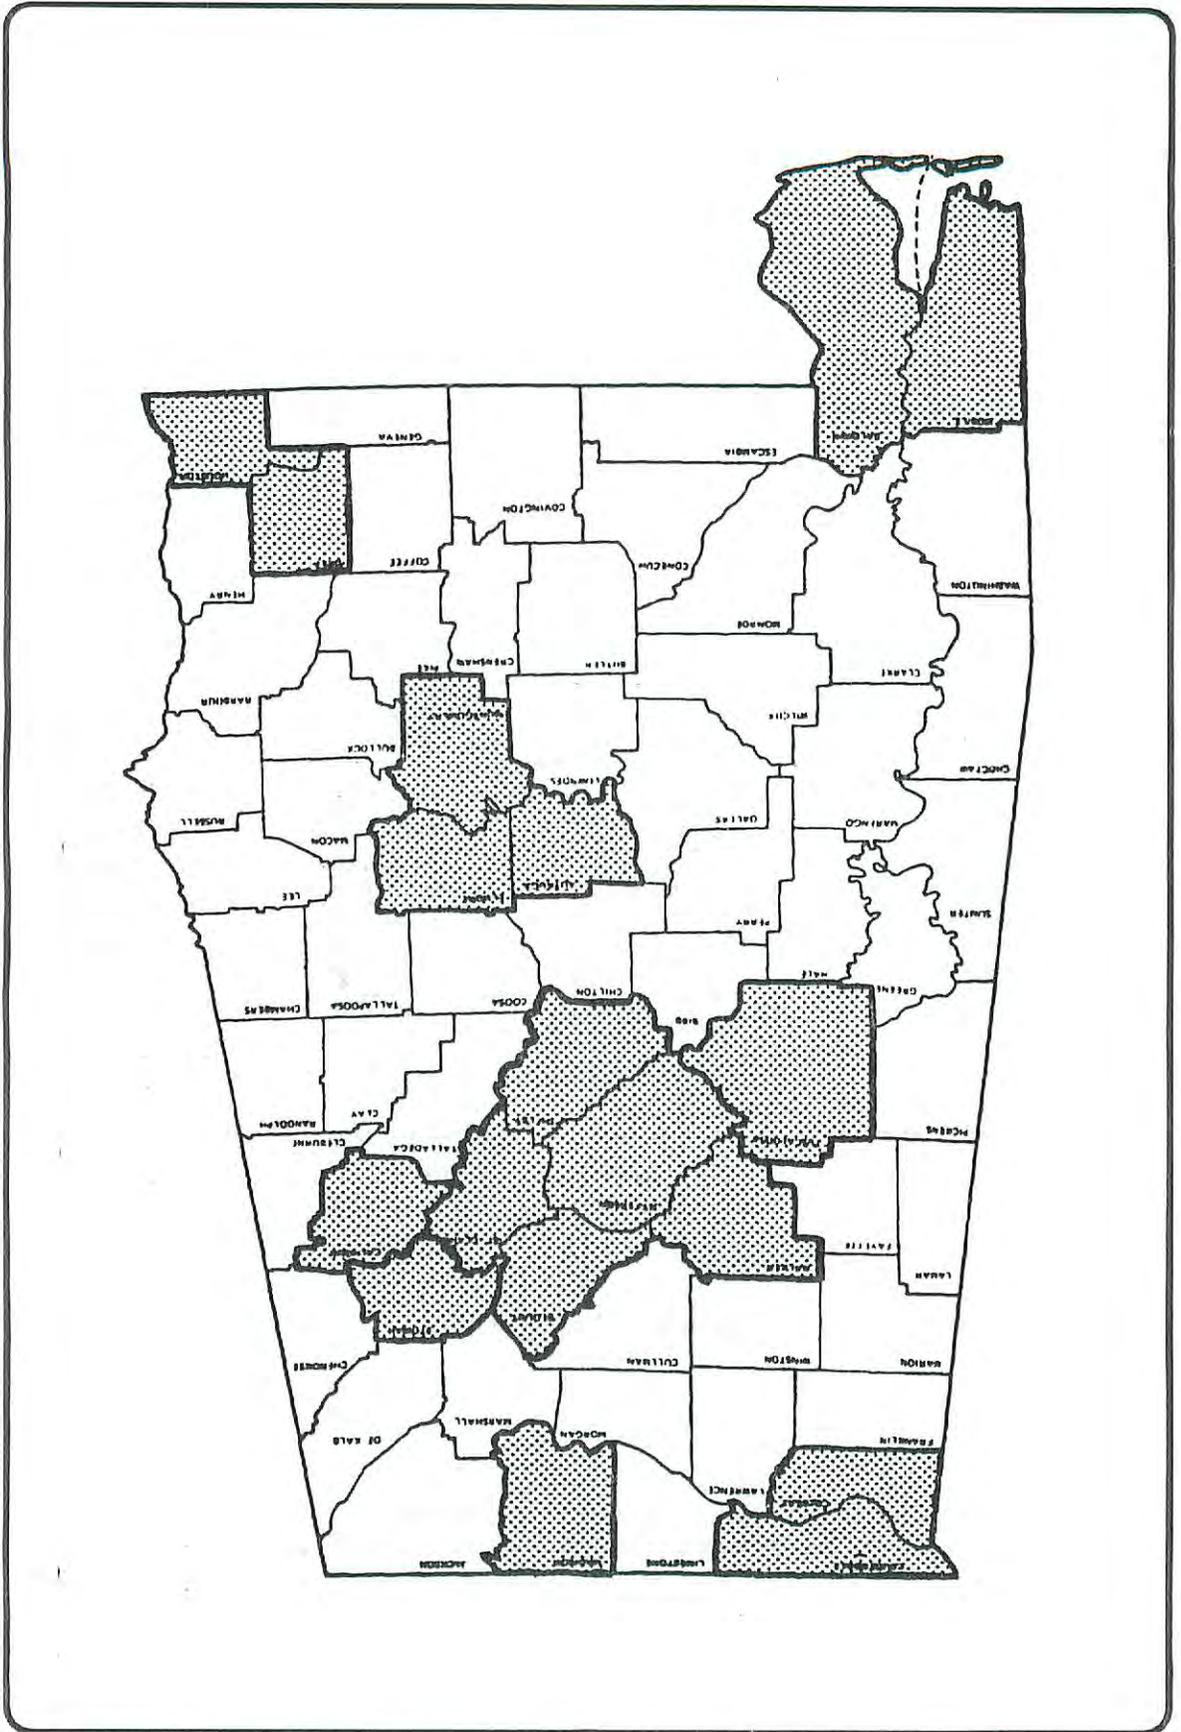

Gadsden - Etowah County

Huntsville - Madison County

Mobile - Baldwin and Mobile Counties

Montgomery - Autauga, Elmore, and Montgomery Counties

Tuscaloosa - Tuscaloosa County

The nine MSA's combined, account for 79% of the state's total Part I Index Crime. The following table gives a breakdown of the individual MSA's compared to the total MSA crime and the state's total index crime.

## **DRUG ABUSE VIOLATIONS**

Drug abuse violations involve the illegal sale, possession, manufacture, use, cultivation, etc. of narcotic and non-narcotic drugs.

**Illegal drugs are divided into four categories:**

1. Opium or cocaine and their derivatives such as morphine, heroin, codeine, and "crack".
2. Marijuana.
3. Synthetic narcotics which are manufactured narcotics which cause true drug addiction such as demerol and methadones.
4. Dangerous non-narcotic drugs which include barbiturates, benzedrine, etc.

# DRUG TASK FORCES

In previous years police and sheriffs' departments were exclusively responsible for submitting drug arrest data. In the past years, 31 drug task forces have been established in Alabama and not all of these task forces are reporting to UCR. Therefore, there may be differences between the number of drug arrests reported by drug task forces and the number reported by the city police department or the county sheriff's office. Data regarding drug task force accomplishments was supplied by the Law Enforcement Planning Division of the Ala Dept. of Economic and Community Affairs.
